Pneumatic Actuator

## ELECTRICAL

Rotork, is at the forefront of innovation in electrical actuators, offering a compact electrical spring return actuator designed for critical applications. setting a benchmark in the chilled water industry. We have installed the highest number of PROFIBUS Smart actuators, in the District cooling applications.

## ELECTRO HYDRAULIC

Rotork specializes in designing and manufacturing compact hydraulic actuators with a decade old proven German technology that combine power and precision in a user-friendly package. These actuators are engineered to be the simplest on the market, ensuring easy installation, operation, and maintenance.

## INDUSTRY WE SERVE

Power

Oil & Gas

Chemical

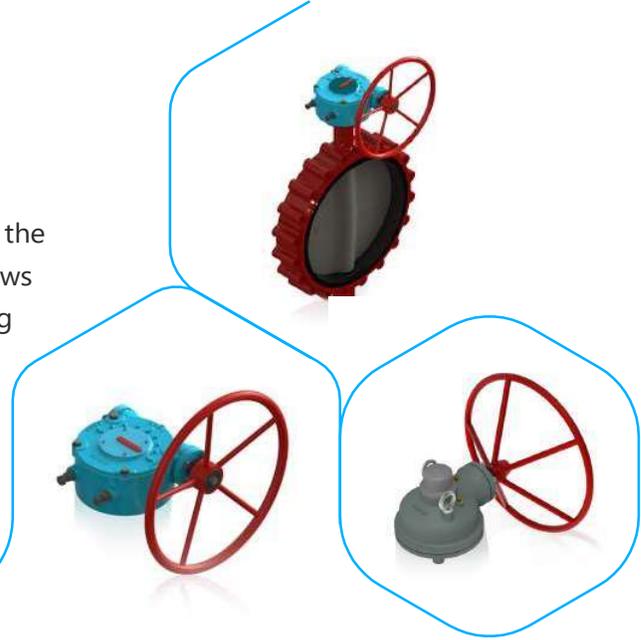

Water

General Industries

## MECHANICAL

Rotork is proud to be a pioneer in integrating technology into mechanical actuators, offering the first of its kind in the market. This innovation allows for real-time monitoring remote control, reducing downtime and providing more durability for the manual valves.

## PNEUMATIC

Rotork is proud to introduce the first localized global standard pneumatic actuators, combining the benefits of global engineering standards with tailored solutions for regional markets. To further enhance our global reach and responsiveness, we have proposed assembly operations in five strategic locations worldwide.

## GLOBAL SATISFIED CUSTOMERS
